15. Area of Interest & Others Involvement:

ResearchArea (Broad area of interest): “Taxonomic Revision of the Family Dioscoreaceae in India”, along with Taxonomy and Systematics of Angiosperms as well as Floristic Study and Biodiversity Conservation of local District.

Significant Contribution to Research: Validly published a new species viz. *Dioscorea longipedicellata* Hoque, Lakshmin. & D. Maity. Another plant species viz. *Dioscorea polystachya* Turcz. has been newly recorded for India by me. One new combination as well as new name (comb. nov. et nom. nov.) viz. *Dioscorea serpenticola* Hoque & P.K. Mukh. Has been made by me. Eight new synonyms have been made by me. Typification for 27 names have been designated by me, of which one taxon has been Holotypified and 26 taxon have been Lectotypified. SEM studies on Dry Leaf Surfaces of 32 species, Hairs of 12 species, Pollens of 26 species and Seed Surface of 24 species have been made.
